StudyTXT:

Code for group and ALL messages in the group at 0.50 cents for the 1st msg and 0.30 cents for all other messages->

e.g. 5 messages in total = .50 cents + 4 X .30 cents = \$1.70 (instead of \$2.50 if all five were downloaded on their own)

Each individual message ordered costs 0.50 cents per message

Work together in study groups with one person downloading one set of messages once only and then forwarding them onto others in the group using your 'free' (500 for \$10 txts) to save money. Then the next person can download the next set and pass them on to others in your study group. This is the cheapest way to get the messages.
